

Leave Them With That

Written and Composed By: Anthony Holloway

Verse

Seventeen and cutting class
Running hard, just burning gas
Friday nights and county lines
Every teacher said I'm wasting time

Pre-Chorus

If I was going to out live my youth
I had to stop running from the truth

Chorus

Started getting up with the sun
Stayed until the work got done
Learned to carry my own load
Stopped tearing up the road
If they ever look back
I'm gonna leave them with that

Verse

Alarm clock before daylight
Steel toes on by first light
Double shifts and overtime
Working for that peace of mind

Pre-Chorus

Now I'm turning all the doubt around
Standing tall on this solid ground

Chorus

Got a little money in the bank
Had a little gas left in the tank
Started seeing what I could be
Through the eyes they couldn't see
If they ever look back
I'm gonna leave them with that

Bridge

Truth is, back then they were right
I was burning every Friday night
Nobody knew what time would bring
Not even me at seventeen

Chorus

Now I'm raising up my own
In the same town I called home
Built a little more than a name
Turned that doubt into a flame
If they ever look back
I'm gonna leave them with that

Outro

Yeah, leave them with that
