

Nothing Between Us

Written and Composed By: Anthony Holloway

Verse

You're pressed against me, moving slow
Whispering what nobody else should know
Drunk on your perfume and that whiskey kiss
Girl, trouble never tasted good as this

Pre-Chorus

One more inch and we're crossing the line
One more touch and you're all mine

Chorus

Come a little closer, let the distance fall
I don't want a single thing between us at all
Let the whole world turn, let the clock lose track
Pull me in tighter, don't hold nothing back
Let the shadows dance with every touch
Till there's nothing between us

Verse

Your dress hits the floor, pull me close
That look in your eyes says you want me most
Your nails trace a fire across my skin
And every slow touch keeps pulling me in

Pre-Chorus

One more kiss and the room starts to spin
Say my name and I'm all in

Chorus

Kiss the back of your neck, you lean into me
Your breath catches softly as you pull me in deep
Your heartbeat runs wild underneath my hand
Your body tells mine what words never can
Let the shadows dance with every touch
Till there's nothing between us

Bridge

Your legs pull me closer, holding me tight
We lose where you end and I start tonight
Tangled in sheets, skin against skin
And neither one of us wants this to end

Chorus

Let the sunrise come, but we ain't letting go
Keep me wrapped around you, still moving nice and slow
Let the clock run on, let the whole world wait
Let the morning find us still wide awake
Let the shadows dance with every touch
We left nothing between us
